

Secure Device Management for Digital Signage

It can be a challenge to find a reliable way to remotely secure and manage devices across a digital signage network. But we've got the solution - Skykit Control is a powerful device and network management tool built specifically for digital signage.

FEATURES

With a base edition and an optional add-on, Control provides the perfect level of oversight for your digital signage needs. Use it to remotely secure, monitor, and manage your devices in real time.

CONTROL CORE: DEVICE-LEVEL MANAGEMENT

DEVICE LOCKDOWN

Limit Skykit hardware or validated partner devices to single-app mode.

AUTOMATIC SKYKIT APP UPDATES

Get automatic updates to Home, Control, and Player apps.

DEVICE STATUS

Easily view online/offline status per device from within the Skykit Beam Displays menu.

CONTROL CONSOLE: NETWORK-LEVEL MANAGEMENT

DEVICE COMMANDS

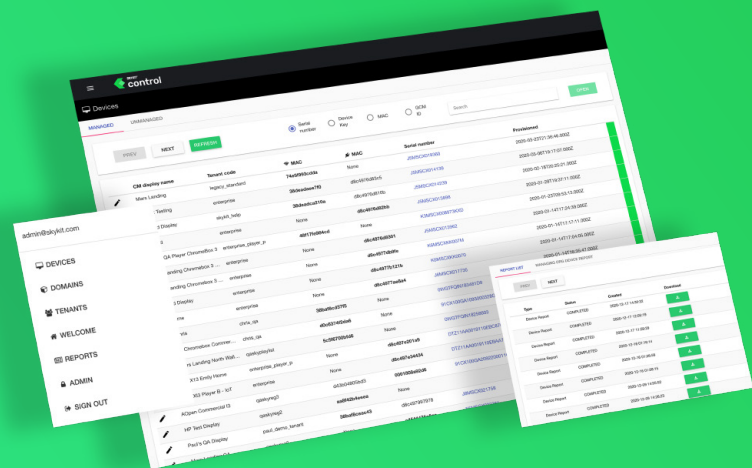

Remotely reset, restart, update, and otherwise control devices.

DEVICE HEALTH & NETWORK STATUS

Monitor device and network performance.

TENANT LOGS

View all logs posted to devices in a tenant.

BENEFITS

Skykit Control makes it easy to monitor and manage your entire digital signage network, regardless of how many devices you're using.

DEVICE MANAGEMENT BUILT FOR DIGITAL SIGNAGE

While standard enterprise mobility management solutions are often costly and cumbersome, Control was purpose-built for digital signage.

REMOTE CONTROL OVER YOUR NETWORK

Manage updates, troubleshoot, and otherwise monitor your digital signage network from anywhere.

EASILY AND SECURELY MANAGE YOUR DIGITAL SIGNAGE NETWORK

Skykit Control puts the power in your hands.
