

SKYKIT SKD10 TOUCH DISPLAY

# 10-Inch Touch Display for Scalable Digital Signage Networks

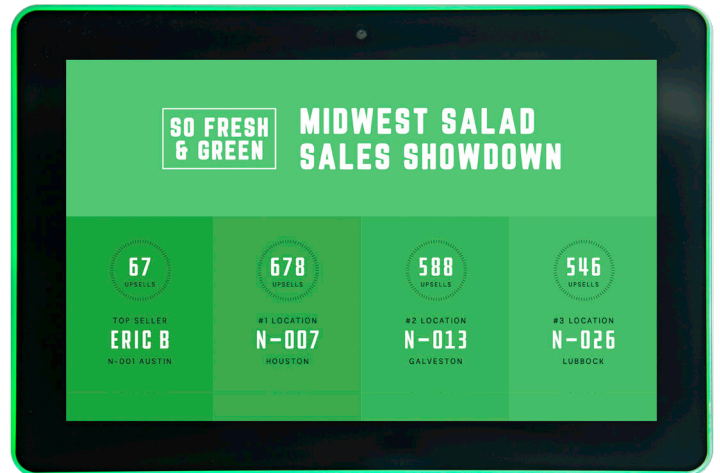

## Your All-in-One Touch Display

The Skykit SKD10 puts the power of digital signage right at your fingertips. This commercial-grade Android touch display is capable of running complex kiosk applications and digital signage messaging with up to 4K resolution. Designed with a 10-inch touchscreen and continuous operation in mind, the SKD10 offers a cost-effective, all-in-one solution for organizations looking to leverage interactive product catalogs, wayfinding applications, waiting room content, and more.

Powered by Skykit Beam, our digital signage content management system, the SKD10 can display a wide range of readily-available content and interactive apps, such as infotainment and social media feeds, secured dashboards, livestreams, dynamic menu boards, and more. The addition of Skykit Turf extends the capabilities of the SKD10 to desk and meeting room booking, along with visitor and employee check-in.

The SKD10 includes Skykit Control, our enterprise-grade device management solution built for digital signage. Control can be used to manage and secure your SKD10 devices from deployment to retirement, allowing you to remotely update Skykit apps, enable device lockdown, and monitor the health of your media players and touch displays – all from the cloud-based Skykit platform.
